fit (if apply): ?:

Who is benefited ? : The general citizen which aims at flotation and aims at a skill rise as realization of new business and homo economics And also residents of Nagoya (city, population 22,000)

Objective : Objective 1: That the general citizen which aims at flotation establishes a will as homo economics

Objective 2: That the general citizen which aims at flotation plans for a skill rise of a business

Objective 3: The general citizen which aims at flotation breaks through the next generation, and have the pride which tries to be opening.

These accomplishing objective brings a social entrepreneur up and develops an individual.

And it leads to promotion of corporate social responsibility.(CSR)

Much of the social innovation for which need is indispensable is born from a venture business to achieve better public opinion.

But the flotation rate which can be put in Japan is hanging over from knowledge in case of flotation, the ability and lack of experience.

The human resources who try to become the entrepreneur who emphasized to have an influence good for society with the sense of mission are to experience a large-scale economic crisis caused by the problem that the present capitalistic economy is structural, and also tend to be increased in Japan.

The human resources who would like to achieve a community service through business activity increase the human resources who try to become an entrepreneur seem to be one as well as the choices as flotation, and to live. But it can not be said that its social capacity is enough.

Even if Japan is expanding the foot of mountain of domestic flotation as well as puts it in the enterprise of existence, it is necessary to be bringing the homo economics which tries to achieve better public opinion up.

↓

A social entrepreneur is needed from society, and the homo economics which was equipped with ability that break through and holds the next generation will do the business activity which caught the economic benefit and a community service with unity.

↓

A social entrepreneur is that flotation and new business are achieved or that the individual he did skill finish of moves in a lively way, and rise is born in society.

↓

Innovation is born in Japanese society, and better public opinion will be achieved.

Recommendations : < achieved part>

Participation understood Japanese-style capitalism and the significance of the social entrepreneur.

After it was possible to learn a necessary thing I looked at myself again and to achieve a will as a business, it was possible to bring the human resources developing activity with executive ability up as a social entrepreneur.

< the point which is most>

The general citizen which aims at flotation established a **Will** as homo economics, and I planned for a **Skill rise** of a business while breaking through the next generation and cooperating with my company with the same target as the **pride** which tries to be opening.

These results bring a social entrepreneur up and develop an individual as well as connect to promotion of **corporate social responsibility (CSR)**.

The social entrepreneur who aims high is achieving the abundant public opinion which is to return its function to an area and is light while settling social problem.

The participation which is here actually succeeded to start **3 nursing home** using the thing learned by this project.

Some participation succeeded to start **the business school** which makes a real estate be activated using the thing learned by this project. Moreover I am thinking it is possible to have **a big impact** upon all over the world when the business on which a vaccine to the developing country some participation proposed can be inoculated for 1 dollar succeeds.
